

Endorsement of SB 467

By Kathy Bradford

On April 2, 2021, a request was made of The Palos Verdes Democrats to endorse California Senate bill 467, sponsored by the [VISION Coalition](#). VISION is sponsoring this historic bill to establish health and safety setbacks and phase out the most dangerous fracking practices in our state. SB 467 will create common sense health and safety setbacks, including a 2500 foot setback from oil or gas wells, and begin to limit the most dangerous fracking practices in our state.

Because SB 467 is making its way through the CA Senate right now, time is of the essence, and because this issue was also presented to the membership by [Last Chance Alliance](#) at the Aug 18, 2019 meeting and was affirmed by unanimous vote, the PV Democrats' board voted to endorse the VISION bill. An article about the Last Chance Alliance presentation and that membership vote can be found on page 3 of the [September 2019 PV Democrats newsletter](#).
